

Amendments to the Specification

Please amend the paragraph beginning on page 19 at line 1 as follows:

The term “Computer-readable medium” as used herein refers to any medium that participates in providing instructions to processor 404 for execution. Such a medium may take many forms, including but not limited to, non-volatile media; and volatile media; ~~and transmission media~~. Non-volatile media includes, for example, optical or magnetic disks, such as storage device 410. Volatile media includes dynamic memory, such as main memory 406. ~~Transmission media includes coaxial cables, copper wire and fiber optics, including the wires that comprise bus 403. Transmission media can also take the form of acoustic or light waves, such as those generated during radio wave and infrared data communications.~~

Please amend the last paragraph on page 21 as follows:

The received code may be executed by processor 404 as it is received, and/or stored in storage device 410, or other non-volatile storage for later execution. ~~In this matter, computer systems 400 may obtain application code in the form of a carrier wave.~~
